NEWS RELEASE

Drillers Contracted Drilling Copper Mountain High Priority Targets

May 25, 2011

Trading Symbol: **SPR – TSX.V**
SPRWF – US OTC

SUPREME RESOURCES LTD. (SPR.V- SPRWF-OTC) (the “Company”) is pleased to announce the commencement of its 2011 exploration & drilling program on its TAS Projects.

The TAS properties are located in close proximity to Copper Mountain Mining Corporation's open pit copper, gold, & silver mine, (www.cumtn.com) 160 kms east of Vancouver and 17 kms southeast of the town of Princeton in southern British Columbia.

The TAS borders and adjoins along Copper Mountain’s southeastern boundary and the properties are located south of the open pits and the Oriole and Rifle areas.

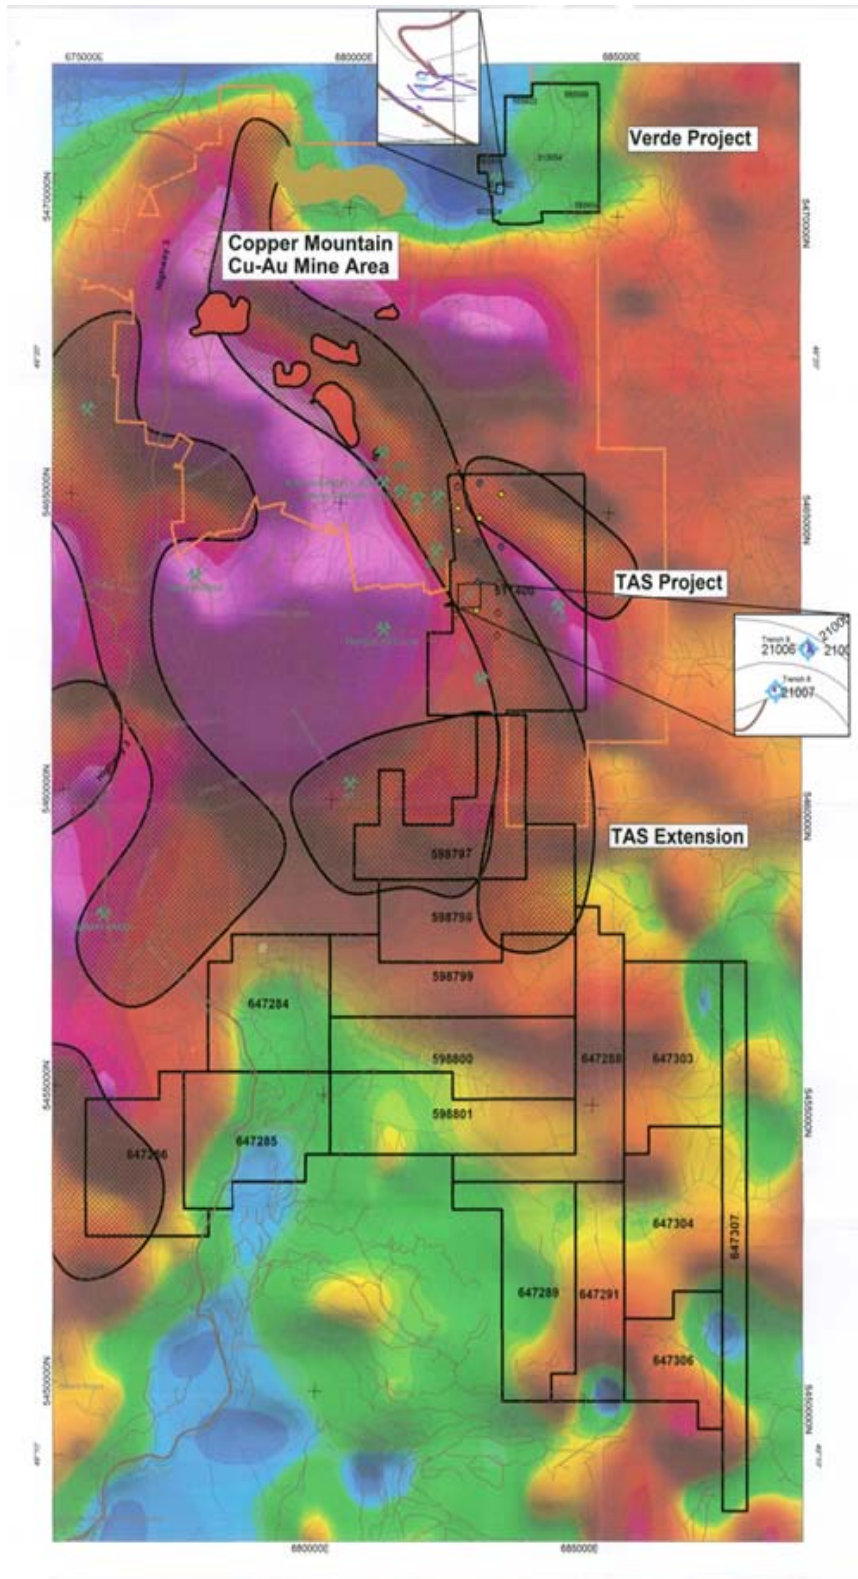

Hard Rock Diamond Drilling Ltd of Penticton BC has been contracted for their drilling services. Consulting Geologist Mr. Grant F. Crooker P.Geo will direct and supervise the 2011 exploration and drilling programs on the company’s TAS properties.

A total of twenty-seven targets have been identified for drilling, seventeen of which are on the TAS claim, and ten of which are on the TAS South Block.

Showing Main Trend into the TAS Projects
(Shown on following page)**

The fall 2010 exploration returned significant drill intersections from the TAS Project and the results confirm the presence of copper-silver mineralization within the Copper Mountain Main Trend.

2011 TAS Drill Targets

● **High Priority** ● **Medium Priority** ● **Low Priority**

The company has selected five high priority drill targets located along the Copper Mountain Trend and are planned to be drilled to average maximum depth of 300 meters per target.

The 2011 exploration program will consist of a minimum of 1500 meters of diamond drilling.

The logistics to mobilize crews and drills to the property has begun and the company will report on the progress.

TSX-V: **SPR**

Allan Levien CEO states “The Company has been waiting for 2 years to drill these high priority targets on the TAS property. Unfortunately the logging activity in the area interfered with our TAS exploration programs in 2009 & 2010. Now with the logging completed, the area is now accessible to drill and we all look forward to the drilling results”.

Further news will be forthcoming in the near future.

ON BEHALF OF THE BOARD
